

TEXASOFT/WINKS SITE LICENSE INFORMATION

Effective January, 2014

What is a site license? A site license is an inexpensive way for more than one person to legally use one copy of a program on more than one computer at a time. Site licenses are designed for companies, offices or schools where more than one person in the organization needs to use a product, but does not need additional manuals or disks. Site licensing enables companies, departments, government agencies, etc., to equip their personnel with the tools they need at a minimal cost.

Here's how it works: The organization purchasing a site license (the licensee) provides a single point of contact for shipping, technical support, upgrades, etc., and we (the licensor) provide a "golden master" of the diskettes/CD, a printed manual, a "manual on disk" and any other parts of the package. Additional manuals are \$29 each (no additional discount.)

The following chart gives a breakdown of the cost of site licensing and how much you save per site licensed. For instance, if you purchased a site license for 10 users (sites) for a product that normally costs \$99.00, your cost would be \$544.50 versus \$999.00.
